IDT Visual Tags are ideal for the identification of livestock, health record keeping, insurance, dairy management, and slaughterhouses. The tags are laser-marked and guaranteed to last for the lifetime of the animal. The ether-grade material resists UV exposure and maintains a high level of elasticity throughout the animal's life cycle. Available in four popular sizes for different animal types, they ensure optimal application and retention. The tags are easy to apply, robust, and tamper-resistant. For best results, it is recommended to use the ID TECH Universal Applicator.
