UHF RFID

RFID UHF Windshield Tag IDT WT 03 is a passive tag that is designed to be attached to the windshield of vehicles. These tags are an essential part of parking automation as they are easy to use and offer a long reading range. They are also tamper-proof, ensuring that they cannot be removed or altered without authorization. With a reading range of up to 10m, these tags can be identified easily over a long distance, making them ideal for use in parking management systems. Additionally, the tags can be imprinted with customized information to meet the specific needs of different businesses.
